Auriga named to Global Outsourcing 100

Auriga has been named to The 2008 Global Outsourcing 100. Selected by the International Association of Outsourcing Professionals (IAOP), The Global Outsourcing 100 recognizes the world's best outsourcing service providers across all industries. It is a rigorously judged, independent ranking that serves as a benchmark to gauge the strength of the industry as a whole and its service providers. Now in its third year, the list has become an essential reference guide for companies seeking new and expanded relationships with the best companies in the industry.

"We are pleased and honored to have made The Global Outsourcing 100 list that defines the standard for excellence in outsourcing service delivery," says Alexis Sukharev, Auriga CEO and founder. "This recognition underscores our commitment to delivering best-in-class software services and bringing value to our clients. Importantly, it also reflects the quality of our people, whose competencies, dedication and hard work have won us trust from our clients."

Earlier this year, Auriga was also named, for the third straight year, to the Global Services 100 list of the top global providers of business and technology services. Only 44 companies have made both the Global Services 100 and the Global Outsourcing 100 lists this year, and Auriga is one of them.

Auriga launches new course on Mercury QuickTest Professional

The Auriga Training Center has begun conducting a new course in Mercury QuickTest Professional (QTP) skills. The need for such skills has been prompted by the growing regression testing effort that can be addressed through automation. Designed by Auriga QA experts, this 8-hour course provides a comprehensive understanding of using QuickTest Professional as an automated functional testing tool for Web applications. The course addresses topics such as recording and running tests, adding synchronization points and verification steps, modularizing and reusing tests. All topics are supported by extensive hands-on exercises that are based on real-life examples designed to provide trainees with the knowledge and skills necessary to automate testing using QuickTest Professional.

The first in-house training sessions were held at Auriga's Moscow head office at the end of February and received a highly positive feedback from the course participants.

Additionally, Auriga QA experts are developing a training course that focuses on using Mercury LoadRunner to load test Web applications to ensure that they will perform and scale under the peak demands of the business. This course is set for May, 2008 at Auriga's Moscow head office. Both courses will then be conducted at Auriga's software development centers in the cities of Kazan and Nizhny Novgorod. The two new courses, that complement the existing suite of Auriga's training courses, will help expand Auriga's testing capabilities.

Auriga builds up expertise in banking and finance sector

With technology playing an increasingly critical role in the banking and finance world, Auriga's strategic decision to tap into the financial services market was not surprising. Within a short time span of over a year, Auriga has already earned a track record of excellence in providing

Elite Software R&D Services

software solutions and services for the leading global financial services organizations, including Renaissance Credit and some of the Top 10 of the Forbes 2000 Largest Public Companies. Auriga helps its banking clients drive operational efficiencies, solve industry specific challenges, and meet their cost reduction goals.

Auriga provides analytical, engineering, support and QA services for its customers that are seamlessly integrated with the customer in-house IT services. Auriga is currently engaged in a number of projects for its finance services clients, including verification of a complex e-commerce system, development and all-round automation of internal IT and business processes, and others. Our clients have recently extended contracts with Auriga and have plans for the Auriga teams to scale up as they have proven highly competent in solving mission critical tasks.

Alexis Sukharev presents the Russia brand in IT outsourcing at E-Services Philippines 2008 in Manila

Since its inception 8 years ago, the Global Outsourcing conference e-Services Philippines (ESP) has annually attracted over 160 exhibitors and 2,000 conference attendees. This year the organizers' shared vision was to make ESP 2008 "The Cannes Film Festival of the Outsourcing Industry". In line with this vision, the theme for ESP 2008 was "Outsourcing Centers of Excellence." The conference was held on February 11-12 in Manila and attracted participants from all significant outsourcing destinations - India, the Philippines, China, Asia, Latin America, and Central and Eastern Europe. The keynote address was delivered by President Arroyo of the Philippines. Alexis Sukharev, Auriga's President and founder, was invited by the Department of Trade and Industry of the Philippines to speak on what makes Central and Eastern Europe unique and especially attractive as an IT outsourcing destination. The invitation noted "the progress Auriga has made over the years to be recognized in the Global Services 100 list of top companies" and stated that "Auriga is truly one of the Centers of Excellence Organizations."

About Auriga:

Auriga (<http://www.auriga.com/>) is a software R&D and IT outsourcing services provider incorporated in the U.S. that has been operating development centers in Russia since 1990. Auriga was the first to focus on satisfying the specific needs of software and hardware high-tech companies as its driving strategy. Included in CMP's Global Services 100 list since 2006 and in top 10 ITO providers in Central and Eastern Europe according to the 2006 Black Book of Outsourcing, Auriga offers a wide range of services covering all aspects of the entire product engineering area and superb expertise in a rich set of knowledge areas from embedded systems and OS internals to enterprise information systems and Web applications. Auriga's client list includes such industry majors and leaders in their segments as IBM, Draeger Medical, LynuxWorks, NMS Communications, Verdasys, and many others.
